Vancouver , USA

Rodika Aryku

Profile

Frontend Developer and UX/UI designer with a passion for learning about the latest web technologies. Work great in a team and solo, love challenges and effectively use excellent communication skills with both - people and computers. Highly creative, easily adaptable, attentive to detail and experienced, Figma, JavaScript, React/Redux development and Node... With experience of living abroad and speaking several languages and unique skills in cross-cultural collaboration. Dream of working in an Agile environmentat at a mission-driven organization and building projects that create an impact.

Employment History

Frontend Developer at Self-employed , Vancouver

`01/2002—Present`

Working as Self-employee Frontend developer since begginig of 2022. This job includes building websites with HTML/CSS, Bootstrap, JS & React. Find bugs and fix coding problems, also maintaining existing projects. Later in July 2023 I added to experience ux/ui design part and since than I combine these skills in almost all my projects. The projects are designed in Figma and after the costumers approving the design I'm moving on to the Programming part.

Below I will share with you the links of some projects.

Online-Beauty-Store website- Github | Demo | React website

- Fully operating multi pages react website with UI part included as loading, alerts, modal window etc.
- The projects includes Routes & Link to navigate from one page to another

Daily-check list app- Github | Demo | Node / React project

- Project Incorporated with React Components and MangoDB database
- Added an edit and delete button to make it easier for users to edit and change their list

Recipes API project - Github | Demo | Web app written in ReactJS and AJAX

- Added a search function to help find the recipe easier
- Used React hooks, Routes for navigation and an external API

Weekly planner - Github | Demo | React project with Route and LocalStorage integration

- Designed and coded two apps in one project for users to find what exactly needed
- Incorporated Routes and link for navigation from one page to other & localstorage to safe the change
